EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

2. The following are examiner's statements of reasons for allowance: Claims 1-7 are allowed because the prior art fails to teach or fairly suggest the recited method of applying electrical energy to an electrostatic precipitator collector by selecting initial energy application and interruption time intervals, determining the optimum amounts of time for the energy application and interruption based upon the greatest peak and average voltage magnitudes

applied, and collecting precipitate on the collector using these optimum amounts of time. Claims 8-13 are allowed because the prior art fails to teach or fairly suggest the recited electrostatic precipitator optimization control method using a high frequency direct current power supply to produce the recited various time intervals for controlling the recited energization and de-energization of the electrostatic precipitator, storing peak and average values of electrical potential, decreasing an active off time interval, repeating the energization and storing steps, setting the active on and off time intervals to a maximum of the peak and average electrical potential values, and operating the electrostatic precipitator by alternately energizing and de-energizing the electrostatic precipitator for these respective on time and off time intervals.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
